SUBJECT INDEX

- All-benzenoid hydrocarbons
Characterization of all-benzenoid hydrocarbons, 367
- Amrinone
Electric field mapping of bipyridine cardiotonics: amrinone and milrinone, 359
- Angiotensin-converting enzyme
A semiempirical molecular orbital and dynamic NMR study of conformational isomerism in angiotensin-converting enzyme inhibitors, 173
- Aniline
The conformation of aniline and its intramolecular force, 69
- 9-Anilinoacridines
Comparison of the 9-anilinoacridines *o*-AMSA (4'-(acridin-9-ylamino)-2'-methoxymethanesulfonanilide) and *m*-AMSA (4'-(acridin-9-ylamino)-3'-methoxymethanesulfonanilide). A molecular mechanics, dynamics and semiempirical molecular orbital study, 283
- Bicyclic diazetidinone
AM1 calculations on a series of bicyclic azetidin-2-ones and bicyclic 1,3-diazetidin-2-ones: investigations towards putative -lactamase inactivators, 237
- C-C bond dissociation
AM1/CI 3×3 studies on C-H and C-C bond dissociations, 123
- C-H bond dissociation
AM1/CI 3×3 studies on C-H and C-C bond dissociations, 123
- C₃H₆
Ab initio molecular orbital studies on a singlet-triplet splitting of C₃H₆ and C₄H₈ molecules, 141
- C₄H₆
Ab initio molecular orbital studies on a singlet-triplet splitting of C₃H₆ and C₄H₈ molecules, 141
- [(η^5 -C₅H₅)Fe(η^6 -biphenyl)]⁺
Electronic structure of the [(η^5 -C₅H₅)Fe(η^6 -biphenyl)]⁺ complex and its reduced states (in French), 57
- Cephalosporins
Theoretical calculations of β -lactam antibiotics. Part 2. AM1, MNDO and MINDO/3 calculations of some cephalosporins, 205
- CH₃OH
A quantum topological study on the interaction between CH₃OH and H₂CO molecules, 297
- Charge alternation
Charge asymmetry and charge-alteration concepts in inorganic and organic molecules, 385
- Charge asymmetry
Charge asymmetry and charge-alteration concepts in inorganic and organic molecules, 385
- Cl₄W=CH₂
Ab initio study of the reaction between Cl₄W=CH₂ and ethylene, 37
- Cluster synthesis
Electronic structures of [M₃(μ_3 -X)(μ_2 -S₂)₃]⁴⁺ (M=Mo,Ti) cluster compounds and the effects of the μ_3 -X cap to the self-assembly in cluster synthesis, 165
- Co₂P₂(CO)₆
Comparative study of semiempirical quantum chemical methods, using Co₂P₂(CO)₆ as a model compound, 395
- Cyclotrimethylene-trinitramine
Ab initio calculations of structural features not easily amenable to experiment. Part 74. Conformational analysis of cyclotrimethylene-trinitramine (RDX), 219
- 1,4'-Dihydroxybenzyl cation
The structure of 1,4'-dihydroxybenzyl cation, 389
- Diisopropylamine
An ab initio conformational analysis of isobutylamine and diisopropylamine, 319
- Diphosphinoamine
An ab initio study of ligands diphosphinoamine and diphosphinomethane in the chelating and bridging geometries, 153

Diphosphinomethane

An ab initio study of the ligands diphosphinoamine and diphosphinomethane in the chelating and bridging geometries, 153

Electron density

X-ray investigation of electron density redistribution on complexation, 11

Energy decomposition analysis

Basis sets for molecular interactions. Part 4. Energy decomposition analysis, 245

Ethylene

Ab initio study of the reaction between $\text{Cl}_4\text{W}=\text{CH}_2$ and ethylene, 37

Ferromagnetic carbon

The structure of the ferromagnetic phase of carbon, 133

First-row diatomic molecules

$X\alpha$ local spin density calculations. First-row diatomic molecules, 83

Flavonoids

Flavonoid conformational analysis: comparison of the molecular structures of (Z)-4,4',6-triacetoxyaaurone and (Z)-3',5'-dibromo-2',4,4',6-tetrahydroxyaurone monohydrate by crystallographic and molecular orbital methods, 345

 H_2CO

A quantum topological study on the interaction between CH_3OH and H_2CO molecules, 297

Hermite-Gaussian functions

Hermite-Gaussian functions as basis sets in ab initio calculations, 229

HF-2HCN

Isomeric interplay in the trimeric systems 2HF-HCN and HF-2HCN, 49

HF-HCN

Isomeric interplay in the trimeric systems 2HF-HCN and HF-2HCN, 49

Histamine

MNDO effective charge model with induced charges on the molecular surface and conformational analysis of histamine in water, 335

Hund's rule

The domination of Hund's rule by the kinetic energy differences for molecular systems at all internuclear separations, 271

Isobutylamine

An ab initio conformational analysis of isobutylamine and diisopropylamine, 319

 β -Lactam antibiotics

Theoretical calculations of β -lactam antibiotics. Part 2. AM1, MNDO and MINDO/3 calculations of some cephalosporins, 205

 β -Lactamase inactivators

AM1 calculations on a series of bicyclic azetidin-2-ones and bicyclic 1,3-diazetidin-2-ones: investigations towards putative β -lactamase inactivators, 237

 LnHe^{3+}

Helium chemistry of rare earth elements: pseudopotential study of the cations LnHe^{3+} , 327

 $[\text{M}_3(\mu_3\text{-X})(\mu_2\text{-S}_2)_3]^{4+}$

Electronic structures of $[\text{M}_3(\mu_3\text{-X})(\mu_2\text{-S}_2)_3]^{4+}$ ($\text{M}=\text{Mo}, \text{Ti}$) cluster compounds and the effects of the $\mu_3\text{-X}$ cap to the self-assembly in cluster synthesis, 165

Methoxy radical

The methoxy radical, 111

Milrinone

Electric field mapping of bipyridine cardiotonics: amrinone and milrinone, 359

Molecular hyperpolarizability

MNDO and MNDO/D finite field calculations of molecular polarizability and hyperpolarizabilities, 261

Molecular polarizability

MNDO and MNDO/D finite field calculations of molecular polarizability and hyperpolarizabilities, 261

 OH^-

Ab initio study of excited Σ states of OH^- (in French), 29

Phenylalkyl sulphides

Investigation of rotational isomerism of phenylalkyl sulphides, 1

Quinazoline α_1 -adrenergic antagonists

Conformational analysis, molecular modeling and quantitative structure-activity relationship studies of 2,4-diamino-6,7-di-

methoxy-2-substituted quinazoline α_1 -
adrenergic antagonists, 307

Racemization

Influence of the interaction between
asymmetry centres on the kinetics of ra-
cemization, 375

Semiempirical quantum chemical methods

Comparative study of semiempirical
quantum chemical methods, using
 $\text{Co}_2\text{P}_2(\text{CO})_6$ as a model compound, 395

Thiocytosine

Semiempirical molecular orbital calcula-
tions on the prototropic tautomerism of 2-
thiocytosine, 195

Water

MNDO effective charge model with in-
duced charges on the molecular surface and
conformational analysis of histamine in
water, 335

X α local spin density

X α local spin density calculations. First-
row diatomic molecules, 83
